

US Army Corps of Engineers

The U.S. Army Corps of Engineers is an innovative, transformative organization providing engineering solutions to customers worldwide. Our 37,000 employees—primarily civilian—are delivering positive impacts for today and tomorrow.

Working at the Corps as a civilian employee means making a direct contribution to warfighters and their families, supporting overseas contingency operations, developing technology and systems that save the lives of soldiers and civilians, providing disaster relief, and protecting and enhancing the environment and the national economy.

It's an exciting time to work for the Corps. We offer challenging professional, technical and administrative assignments in the U.S. and abroad—each building on a strong tradition of public service extending back more than 200 years.

The Corps also offers education reimbursement, certificate programs, professional and leadership development as well as mentoring programs. We support and nurture the growth of our employees and provide the tools to ensure superior performance in all our missions. At the Corps, your opportunities are limitless.

Visit www.usace.army.mil/employment to find out more about our unique mission, employment opportunities, and the steps needed to become part of the GREAT Corps team.
